

Lei Zhe Yu

[+1\(408\)772-6837](tel:+14087726837) - leizheyu1@gmail.com

Summary

Data Science student with a strong foundation in statistics and programming seeking an opportunity to apply analytical and computational skills to real-world data problems.

Education, Certifications, and Skills

Data Science B.S. | University of California San Diego Expected Graduation 06/2027
La Jolla San Diego

Relevant Coursework: C/C++ Programming, Java Programming, Program Structure, Data Structure, Principle of Data Science, Linear Algebra

Technical Skills: Data analysis | Python programming | Linux administration | Data visualization | Java programming | C/C++ Programming |

Work Experience

Computer Science Research Assistant 02/2025 - 06/2025
San Jose City College | San Jose Ca

- Managed server data storage, organization, and access permissions for over 500+ student and staff users for research and instructional use.
- Oversaw daily operations of departmental data servers, improving system uptime and storage efficiency by 15%.
- Supported server rack maintenance, including cable management, hardware installation, and network configuration.

Research Assistant – Bioinformatics / Data Science 06/2024 – 08/2024
San Jose State University | San Jose Ca

- Analyzed 100 GB+ genomic datasets to study spatial patterns of deleterious genes relative to topologically associating domain (TAD) boundaries.
- Collaborated with a faculty advisor to interpret data and connect findings to biological mechanisms influencing gene regulation and expression.
- Utilized Python, Pandas, and Plotly to visualize chromatin interaction data, identifying trends in gene density and coding sequence lengths with 90% accuracy in model predictions.

Dreamer Resource Center Student Assistant 11/2023 – 6/2024
San Jose City College | San Jose Ca

- Assisted over 200 undocumented and AB 540 students by providing information on scholarships, legal aid, and financial aid resources.
- Developed and deployed a fully functional website for the Dreamer Resource Center using HTML, CSS, and JavaScript, linking 50+ student resources and improving accessibility metrics by 30%.

Community Service Officer 1/2026 – current
UC San Diego | San Diego Ca

- Ensured campus safety by performing nightly patrols, conducting building security checks, and providing safe safety escorts for students, staff, and faculty.
- Acted as a first responder for non-emergency situations, coordinating with the UCSD Police Department to manage traffic control, report suspicious activity, and assist with large-scale campus events.

Projects

Smart City

- Developed an IoT-based environmental monitoring system using Raspberry Pi and DHT11 sensor; programmed in C and Python to stream real-time temperature and humidity data to ThingSpeak, and applied linear regression modeling to predict short-term environmental changes with over 90% accuracy.
